

Account for the User Manual

According to the feedback, now we will explain something for the user manual:

1. The different size of different window.

It's more convenient to explain all the buttons in different window. Some windows have more buttons, some have less, so the different size of the picture is not equals to the window has different size. In the program, all windows have the same size.

2. The lock in lessons.

We have correct the lock icon in slide 4 and slide5. So the lessons could be done in order.

3.Add the slider to the learning interface.

Look slide 6, we add the slider to do the scrolling.

4.The result interface.

The judgment table just shows the wrong answer and can give user the correct answer for the question.

BRIEF SUMMARY

This is a software which help you learn English. You can learn the words by reading and listening the radio, and after learning, we prepare some interesting testings for you to strength your memory of the words. If you are new to the software, you have to start from Lesson 1, and only you finish Lesson 1, can you start next lesson. But if you have learned many lessons, you can choose any lesson to review as you like, so do testings. You will get your grades when you finish testing, however, it will give you some advice according to your grades.
